

About FTO Services

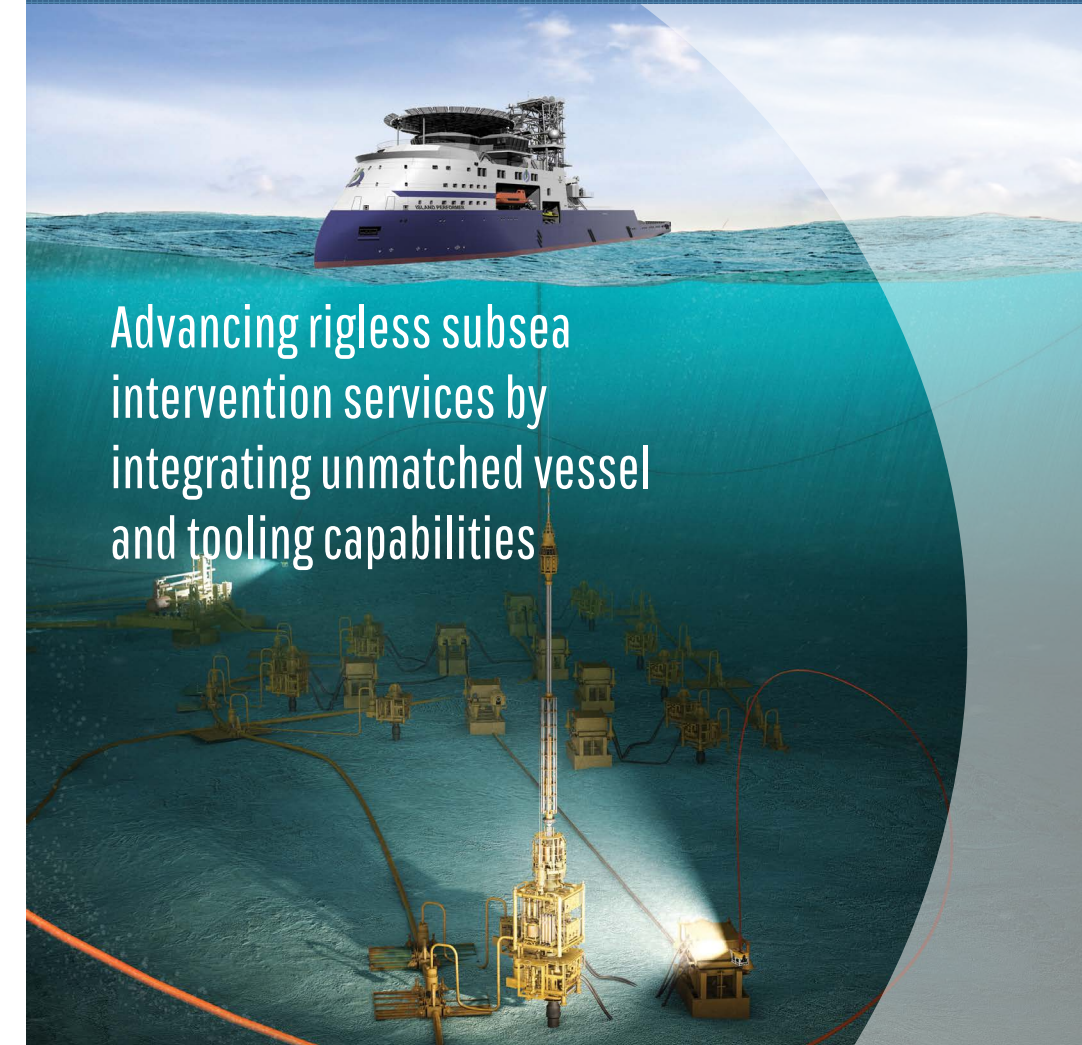

FTO Services was founded in 2012 as a joint venture between FMC Technologies, Inc. and the Edison Chouest Offshore companies to provide subsea riserless light well intervention services. The company brings a unique and proven business model of service delivery through an integrated team approach that is based on more than ten years of well intervention operations in the North Sea. FTO Services combines the leading subsea systems, tooling and engineering capabilities of FMC Technologies, Inc. with the diverse vessels, port logistics and ROV operations of the Edison Chouest Offshore companies.
